great deal safer than profitable insecticides and can be used at home without panic of insecticide poisoning.

Clove oil-based insecticides

Homeowners or Many are turning to natural cleaning products and organic pesticides to protect their loved ones from harmful ingredients in many commercial products. Organic, based on clove oil, insecticides can be purchased online and in retail shops. The products are effective both in and out against a variety of insects, including ants, beetles, flies and cockroaches. These products typically work through a combination of essential oils such as clove oil, diatomaceous earth, breaking the exoskeleton of insects on contact, causing dehydration and death.
