Lecture 3 - Porter’s Five Forces Competitive Analysis
(Researched Examples in blue)

Porter’s 5 Forces Model is a good analysis of the current situation in determining the answer to where are we now? in the planning cycle.

The 5 forces are:
- Existing Competitors
- Threats from New Entrants
- Threats of Substitutes
- Bargaining power of Suppliers
- Bargaining power of buyers

The strength of these forces ultimately affects the profitability of the industry and a firm’s ROI (Return on investment).

A weak force is seen as an opportunity and allows the firm to dominate that area.

First the industry competitors need to be identified, their objectives, strategies, strengths and weaknesses, their potential reactions.
