#Posterior view

**SUPRASPINATUS MUSCLE** lays in the supraspinatus fossa and attaches to the greater tuberosity of the humerus.

*Nerve supply:* subscapular nerve  
*Arterial supply:* subscapular artery

**INFRASPINATUS MUSCLE** lays on the infraspinatus fossa, underneath the scapular spine, and joins with the greater tuberosity of the humerus.

*Nerve supply:* subscapular nerve  
*Arterial supply:* subscapular artery and circumflex scapular artery

**TERES MINOR** lays underneath the infraspinatus muscle and joins with the greater tuberosity of the humerus.

*Nerve supply:* axillary nerve  
*Arterial supply:* subscapular artery and circumflex scapular artery

**TERES MAJOR** lays underneath the teres minor, in the inferior angle of the scapula and joins with the lesser tuberosity of the humerus.

*Nerve supply:* subscapular nerve  
*Arterial supply:* scapular circumflex artery and circumflex humeral
