- Children and older people both know how to display emotions one way or another

Similarities and differences between children and older adults in social development

- Children are more confident and therefore make friends faster

Pregnancy:

- This happens as soon as the sperm enters the egg
- The cell then begins to divide
- The collection of cells travels to the lining of the uterus
- The embryo is attached to the uterus by the placenta

First trimester – (0 to 13 weeks) – this is the most important part of the baby’s development. The mother often has many symptoms such as nausea, fatigue and breast tenderness
