1. **How many pairs of sex chromosomes?**

2. **3 sections of maternity unit?**
   1. labor and delivery
   2. post partum
   3. newborn nursery

3. **Functions of the mucosal lining of the uterus?**
   1. lubes vagina
   2. bacteriostatic agent
   3. provides alkaline environment to shelter sperm
   4. produces mucus plug

4. **Functions of amniotic fluid?**
   1. maintain even temperature
   2. prevents amniotic sac from adhering to the fetal skin
   3. allows symmetrical growth of fetus
   4. allows buoyancy and fetal movement
   5. acts as a cushion to protect the fetus and umbilical cord from injury

5. **Functions of vagina?**
   1. provides passageway for sperm to enter uterus
   2. allows drainage of menstrual fluids and other secretions
   3. passageway for delivery of fetus

6. **Sequence of tubal transport of the zygote**
   1. zygote formed by union of sperm and ovum
   2. forms solid ball called morula
   3. blastocyst
   4. trophoblast
   5. embryo
   6. fetus

7. **Pregnancy can occur with intercourse as long as _____ days before ovulation.**

8. **How long is the average period?**

9. **In middle age when were children no longer considered infants?**

10. **Fertilization to implant takes up to?**

11. **Age of viability**

12. **How many pairs of autosomes?**

13. **How long does the ovum stay alive after ovulation?**

14. **Complete number of chromosomes?**

15. **Normal length of Umbilical Cord**

16. **Father of peds who founded childrens hospitals**

17. **Chorion + amnion form?**

18. **During**

19. **Certified Nurse Midwife**

20. **Certified Nurse Specialist**

21. **Childrens bureau**

22. **Erectile body most sensitive**

23. **Amniotic sac**

24. **What causes shedding of endometrium during period?**

25. **Describe the birth process in the 1960’s**
   1. moms placed in twilight sleep
   2. fathers outside in waiting room
   3. infant kept from parent for hours.

26. **Is from two separate fertilized ovum (fraternal)**

27. **Lubes introitus during sexual arousal not normally visible.**

28. **Outermost germ layer; produces sense organs, nerves, and outer layer of skin**

29. **The zygote in blastocyst stage transforms into 3 primary germ layers what are they?**

30. **Nurses role is to ________ family?**

31. **Innermost germ layer; develops into the linings of the digestive tract and much of the respiratory system**

32. **A long, coiled duct on the outside of the testis in which sperm mature.**

33. **Minimum working age**

34. **T/f there is ovulation on the first cycle?**

35. **Recognises strength and integrity of family as a unit.**
