priests, Vaisyas, traders and farmers, Sudras (common laborers), and later a lower class called the untouchables evolved, these people transported dead bodies.

- These classes eventually became hereditary, making it impossible to move up or down in society and punishable by death to marry outside your class.
- The Aryans introduced the Indians to a polytheistic religion in which the gods were anthropomorphized.
- Eventually this religion was made much more complex with many more rituals, worships, and beliefs many of which included sacredness of a sort.
