</table>
| **How do you treat a hypo?** | • Check BM (< 3.5 mmol/l)  
• Conscious  
  o Oral glucose:  
  o Lucozade  
  o Dextrose tablets  
  o Fruit juice  
  o Lemonade  
  o Jelly beans/babies  
• Unconscious  
  o 999  
  o A B C D E  
  o IV glucose (glucose 20% 100ml)  
  o Glucagon 1mg SC/IM  
• Wait 10 minutes and recheck  
  o If still hypoglycaemic repeat  
  o If recovered eat complex carbohydrate  
  o Once recovered give long acting carb  
  o DO NOT OMIT INSULIN INJECTION IF DUE JUST REDUCE DOSE |
| **What would a paramedic give?**  
(How much IV glucose? What %? How many mls?) | |
