CNS:

- Cranial nerves: NORMAL
- Motor system:
  - Generalized wasting
  - Muscle twitchings
  - Tone, DTR, plantars – normal
- Sensory, cerebellum & gait – not examined
Electrolytes

Na+ : 138

K+ : 7.1

- Urine R/E: numerous pus cells

- FBS: 119 mg/dl
Hyperkalaemia

- 6-7: tall tented T waves
- 7-8: Loss of P, QRS widening
- 8-9: sine wave
- >9: A-V dissociation, VT, VF, cardiac standstill
5) Cation exchange resins
- Na+ or calcium polystyrene sulphonate
- 15 mg per os or per rectum
- Every 6 hours
- 4 hours to act

6) HD
