**Sumatriptan**

- Relieves migraines (short acting)
- Reduces nausea and vomiting
- Oral, subcutaneous or intranasal (not IV because risks coronary vasospasm)

**Ondansetron**

- Reduces nausea and vomiting
- Most widely used drugs for chemotherapy-induced emesis

**Dolasetron**

- Once-daily

**Cisapride**

- Prokinetic agent, used to treat gastric emptying disorders and gastroesophageal disease
- Avoid if intestinal obstruction
- Associated with serious cardiac arrhythmias (there are safer alternatives)
- Not marketed in Australia

**Cyproheptadine, Pizotifen**

- Histamine receptor antagonists
- Allergy (less sedating than other antihistamines)
