

- POWER OF A LENS:
 - The degree of convergence and divergence of light rays achieved by a lens is expressed in terms of its power.
 - $P=1/f$
 - SI unit of power is dioptre, D.
 - $1D=1m^{-1}$
 - 1 dioptre is the power of the lens whose focal length is 1m.
 - Power of a concave lens is negative and power of a convex lens is positive.
