2-The company as a distribution unit :

Example 1:

A carpentry sold a production for 60,000 dh.

The woods: 9000 dh

Painting: 11,000 dh

Glue: 300 dh

Nails: 100 dh

Questions:

1-Determine amount of purchases.

2-Calculate actual production.

Answer:

1- Purchase amount:

Wood + paint + glue + nails

$9000 + 11000 + 300 + 100$
