Open New folder

CA Modeller

You can find many useful example scripts in the examples\automodel directory. It is recommended that you use Python to run Modeller scripts. However, if you don't have Python installed, you can type 'mod9.16' to run them instead.

```
D:\Modeller9.16>cd examples
D:\Modeller9.16\examples>cd rv gnd2
D:\Modeller9.16\examples\rv gnd2>
```

CA Modeller - mod9.16 model-default.py

You can find many useful example scripts in the examples\automodel directory. It is recommended that you use Python to run Modeller scripts. However, if you don't have Python installed, you can type 'mod9.16' to run them instead.

```
D:\Modeller9.16>cd examples
D:\Modeller9.16\examples>cd rv gnd2
D:\Modeller9.16\examples\rv gnd2>mod9.16 malign.py
'import site' failed; use -v for traceback
D:\Modeller9.16\examples\rv gnd2>mod9.16 model-default.py
'import site' failed; use -v for traceback
```
