

Set up a blog or Hud pages that relate to the affiliate programs.

Post a informative response and include your affiliate product in your response. A softer sell is to post a review of the product on your blog and then post a response to the list/discussion forum stating that you've reviewed the product and they can find out more on your blog. You can also set up a Hud page and refer people to your Hud page.

You will probably need to make 3 to 4 sales to earn \$100 in commissions.

Develop Your Own Product

This is the way you can make real money on the Internet. The question is: Can you do it in 24 hours? It would be very difficult to research a niche or market, decide what need is hottest and that you have the knowledge for, write the report, write the ad copy or sales letter, set up a blog/website/squidoo page and then market the report. In the real world in real time, it's not feasible.

What you can do while you're working on the other ways to make \$100 in 24 hours is jot down ideas you have that would be the basis for a product. Then when you have the time you can start developing the product.

You can develop a short report, 2500 words or so, a long report, 2500 to 5000 words, or an ebook, 7500 words and up. You could also develop an ecourse that's a combination of emails, an ebook, chats, and perhaps conference calls.

Get Paid to --- Take Surveys, Receive Offers, Read Email

First rule don't pay someone to find out information about the "Get Paid To" companies.

There are too many sites which falsely represent that you will be paid cash for taking surveys, referring visitors, or accepting offers. Some of these offers require a credit card. You sign up for a free month of XYZ movies, get paid \$15 for accepting the offer and provide your credit card number. If you don't cancel the

are just a few of the free sites where you can quickly and easily set up your blog.

Pick a market niche you're familiar with as the topic for your blog. Every day post on your blog. Of course that's not all you need to do. You have to get people to your blog to read it and hopefully click on your paid ads, or on the products you're promoting as an affiliate.

Most of the blog sites are searchable by keywords. Search on the same words you've used for your site to find other blogs. Then leave a comment on the relevant blogs and include your link to your own blog.

You can submit your blog's url to search engines so if someone wants information on 'how to raise guppies' and that's the subject of your blog, your blog shows up for visitors to find.

With a little bit of research and time you can become successful and increase your bank account with Online Marketing just by blogging.

Submitting Links to Articles, Websites and Blogs to Social Networking Sites.

You can submit links to other people's articles, etc. to the social networking sites. The pay isn't terrific, usually no more than a couple of dollars per article. You'll have to set up an account at each site. Below is a list to get you started. With a bit of research you can find quite a few more. Offer the service on Digital Point the same as you would offer to ghost write articles.

Setting up the accounts at the social networking sites will probably take a couple of hours. If each article takes 20 minutes to post at all the social networking sites and you charge \$4 for the service. You'd earn \$12 an hour and would have to work a little over 10 hours to earn \$100.
