

Taken from Moore et al, Clinically Oriented Anatomy, Seventh Edition.

Innervation of ovaries and uterine tubes

- Derived partly from ovarian plexus, and from ovarian plexus
- Visceral afferent pain fibres ascend to cell bodies in T11-L1, with descending SNS fibres and lumbar splanchnic nerves
- Visceral afferent reflex fibres ascend to S2-S4 with descending PNS fibres and inferior hypogastric plexuses and pelvic splanchnic nerves
