

EDUCATION

Education is the most important factor for the development of human civilization. Education provides the nation with man powers, promotes national unity and uplifts public awareness. A country needs different kinds of man powers such as doctors, engineers, teachers, administrative officials, economists, judges and other technical hands. Education provides the nation with those educated hands. If people are educated, they can understand their duties and rights. In order to uplift human society, each should be capable to understand others. If people can understand each other, they will be united. Thus, education can promote national unity. In order to uplift the degree of awareness of the society, education plays a prime role. It makes all people conscious. They will not follow the old dead and evil tradition. Educated people can reform the society. They can understand what is wrong and what is right. They can save good traditions. Education profoundly enhances human prosperity.

PSYCHOLOGY

Psychology is the study of the mind and of thought, feeling, and behaviour. It is an academic and applied discipline which involves the scientific study of mental functions and behaviours.^{[1][2][3][4][5]}

Psychology deals mainly with humans but also sometimes with animals. Because psychology is difficult to study as a whole, psychologists often only look at small parts of it at one time. Psychology has much in common with many other fields, and overlaps with many of them. Some of these fields are medicine, ethology, computer science, and linguistics.

In this field, a professional practitioner or researcher is called a psychologist and is a social, behavioural, or cognitive scientist. Psychologists attempt to understand the role of mental functions in individual and social behavior. They also explore the physiological and neurobiological processes which underlie cognitive functions and behaviours.

SOCIAL WORK

Man is a social animal. He cannot live alone. Society provides all comforts and necessities of life to man. Man has an obligation towards the society. Especially, it is the duty of the students to do social service to others. Students have no worries about earning their livelihood. They have strength and capacity. Eighty per cent of our population lives in villages. Students should go to the villages and serve the villagers during vacation. Villagers are illiterate, innocent and ignorant about their rights and responsibilities. Students can provide help to these people. They can also help people when there are earthquakes, famines or epidemics. Students should not waste their free time in watching movies or leading a dull life. They should do some kind of social service.
