

Appropriate diet for a veteran horse

- This Baileys senior feeds is highly digestible, adds conditioning and has extra nutrition levels. It is suitable for light work and contains micronized cereals, soya oil and digest plus prebiotic.

This helps with gut efficiency, coat condition and has extra minerals and vitamins.

Energy requirements must still be met and they may need a little more than the younger horses if they are still in work to keep their health and condition up. This means they may need a few more carbohydrates
