

2005 Jun 2H Q8 a)

8. The diagram shows a typical bacterium, with parts labelled P, Q, R and S.

(a) (i) Which part is made from DNA?

(1)

(ii) Which part is the cytoplasm?

(1)

Specimen paper 2003 2H Q6

6. The table gives possible features of three different types of organism.

Complete the table by putting a tick into the box if the organism has the feature.

Each row has **one** tick only. The first one has been done for you.

Feature	Type of organism		
	plant	fungus	virus
They are all parasites			✓
They store carbohydrate as starch			
They can only reproduce inside living cells			
They grow by producing a mycelium			
They feed by extracellular secretion of enzymes onto food
