

Medial two third:-

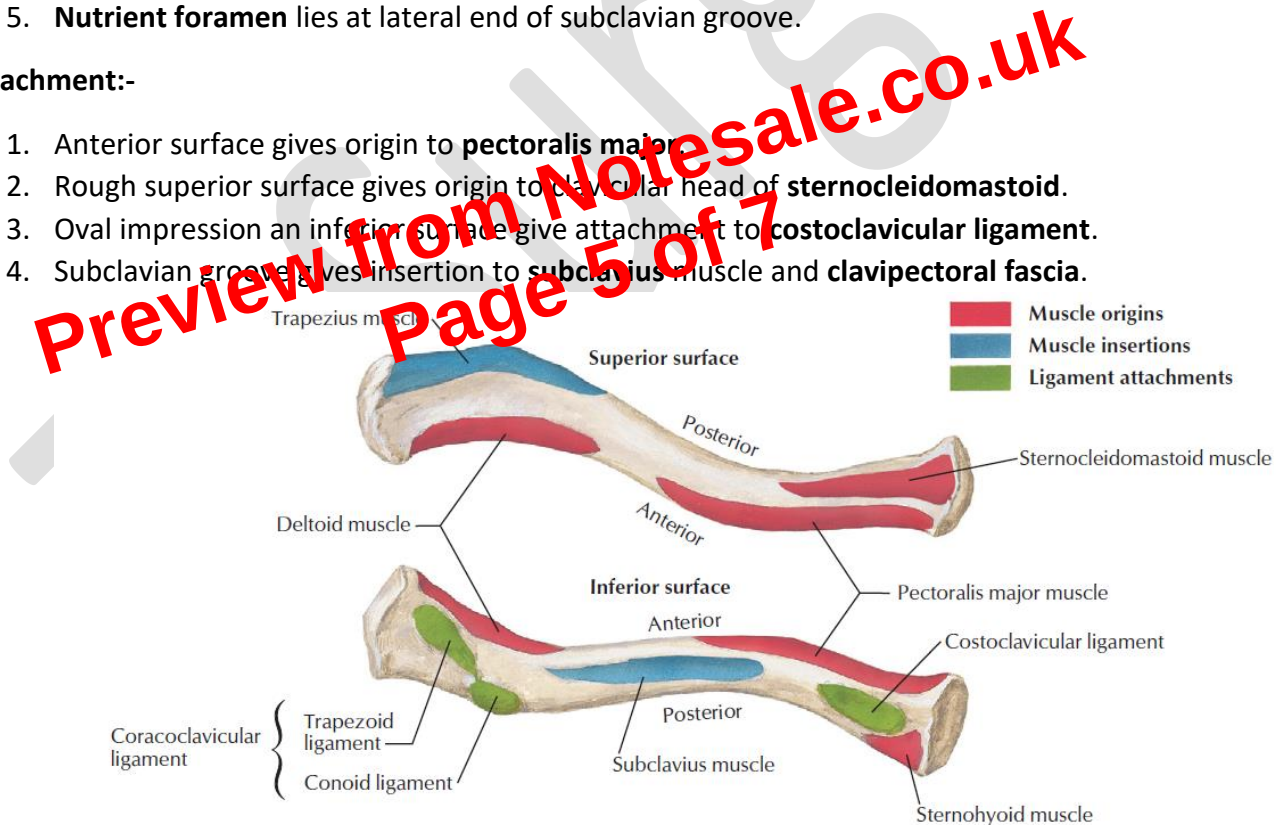

1. Round in shape
2. Has four surfaces **anterior, posterior, superior and inferior.**

Surfaces:-

1. Anterior surface is **convex forward.**
2. Posterior surface is **smooth.**
3. Superior surface is rough in its medial part.
4. Inferior surface has oval impression and lateral part of this surface has a longitudinal **subclavian groove.**
5. **Nutrient foramen** lies at lateral end of subclavian groove.

Attachment:-

1. Anterior surface gives origin to **pectoralis major**
2. Rough superior surface gives origin to clavicular head of **sternocleidomastoid.**
3. Oval impression on inferior surface give attachment to **costoclavicular ligament.**
4. Subclavian groove gives insertion to **subclavius muscle** and **clavipectoral fascia.**

Nutrient Artery:-

Branch of **suprascapular artery** (branch of thyro-cervical trunk).

Ossification:-
