

Cells

Thursday, 23 July 2015

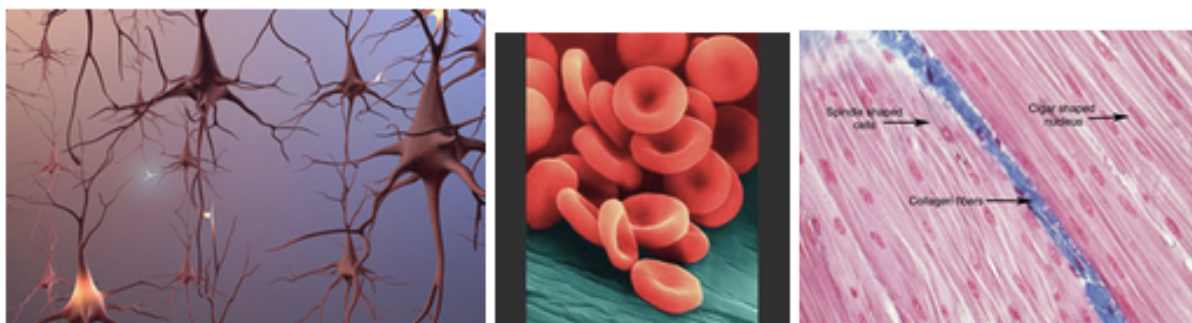

11:28 am

- All living things including humans are made of cells
- We are multicellular organisms made up of trillions of cells
- Multi-cellular organisms are made up of different types of cells. These cells are specialised to carry out different jobs.

Different Types of Cells

The diagrams above show muscle cells, nerve cells and blood cells

General Cell Structure

Even though we have specialised cells in our body they are all made up of much
