I am seeing people asking this question over, and over again, from Newbies who are trying to make it in the internet marketing field. After all you want to make money online as a nice side income, or even a full time income one day right?

But you do not want to go around chasing pipe dreams buying course, after

that interests you. **Tip:** If you see a lot of active forums about a particular niche it's more than likely a profitable niche

- Buy a keyword rich domain name targeting a phrase that is highly searched with low competition in the search engines. Use the free Google adwords keyword tool to do your keyword research.
- Start a self hosted WordPress blog, or even a regular website. It is your choice it is your online business. I prefer blogs because they rank better in the search engines **P.S.** Google loves blogs. But if your niche requires a regular website that will work just as fine. I use Hostgator and I like them but go without whoever you want.
- Monetize your blog, or website, with your own products if you have any. Or affiliate offers, Google adsense ads, or maybe even Kontera like ads for your content. There are tons of great ways to make money with a blog, or website. I personally like [Clickbank](#), [Capbank](#), [Payspree](#), [Digireults](#), [Commission Junction](#), or even [Amazon](#) if your state is not banned yet lol. Proceed with caution with them these days.
- Only post 100% unique content to your blog. If you post unoriginal copied content from other websites, or blogs, and pawn it off as your own Google will slap your site big time and you will not rank highly for any keywords in the search engines. **P.S.** This means less money in your pockets. Do it right or do not do it at all. If you want to [learn more about ranking highly in the search engines this course](#) will help you out a lot. If not you can always learn seo on your own it will just take you a lot longer.
- **P.S.** Your going to have to build some backlinks to your blog too so your site ranks well in the search engines and potentially makes you some really big money one day. The higher the competition of your niche the more backlinks you are gonna need to rank well in the serps.
- Once you get some 100% unique content added to your blog and you have a good base to work with now it is time to drive traffic to this bad boy and hopefully make some money. You can drive free traffic a number of ways article marketing, seo, blogging, forum posting, press releases, video marketing, blog commenting, social networking, the list

Fivver is also a great source for us Internet marketers who are reading this post. Do you need cheap advertising for your website, or blog? There are tons of marketers on [Fiverr](#) who are offering great services for only \$5.00 dollars. You can really find some diamonds in the rough on this website just by browsing around. Here are a few examples I found.

1. Building an email list – This is the single most important activity you can be engaged in (Listbuilding) The money is in the list. Once you build up an email list of about 500 then you can start swapping with other internet marketers. The first 500 – 1, 000 is always the hardest after that your list will grow a lot faster. A couple cool adswap sites to build up your list faster are <http://www.safeswaps.com> and <http://ultraswaps.com> which is the new kid on the block, but it is

which is chump change compared to the money I make by being a member. Not to mention all the free website traffic that I can handle.

44. Digitalpointforums - This is a very high traffic forum for you to participate in – where you will see a nice increase in your websites traffic through your forum signature link. You make a forum signature link for all forums that you join online that will be a link to your website, or blog for all you beginners reading this!

45. RSS Feeds - If your a blogger just submitting your blogs rss feed to the major rss directories will increase your website traffic.

46. Squidoo.com – Create a squidoo lens promoting your website, or blog. Many internet marketers swear by Squidoo. I swear by Hubpages. But too each their own, we all have our own opinions. But one thing we can both agree on is that Squidoo is a great traffic source.

47. Netprofitstoday.com - Run by super affiliate marketer Rosalind Gardner. She has made millions online throughout her internet marketing career and she runs a blog that can point you in that same direction. Rosalind Gardner is a very well respected marketer in the IM community. Her blog is top notch so check it out!

48. Fiverr.com - Everything you would do to make \$5 bucks. You can set up gigs for yourself, or buy gigs. It is also very useful for increasing your websites traffic levels. Fivver is used by a lot of top internet marketers -myself included.

49. Social Bookmarking Sites - Make sure you submit your blog, or website to the top social bookmarking sites. Digg.com, Google bookmarks, Yahoo bookmarks, Msn Bookmarks, Stumbleupon, Delicious, Furl, Reddit, etc... etc...
