

Nodule	A small collection of tissue that can be felt (is palpable) at any level of the skin. They range in size from 1 – 2cm in diameter
Papule	A small pimple or swelling in the skin, often forming part of a rash
Plaque	A well-circumscribed, elevated, superficial, solid lesion, greater than 1cm in diameter
Pustule	A small pimple or blister on the skin containing pus
Vesicle (aka blister)	A fluid-filled sack in the outer layer of the skin
Wheal	A raised, itchy (pruritic) area of skin that is sometimes an overt (obvious) sign of allergy
