

The concept of the method remained until the middle of the sixth century AD in the context of indoctrination, speech, discussion and dialogue. The method then evolved into the use of the senses, the method of trying and playing, the method of solving problems, teaching on the basis of experience, the method of the project and so on. In the 20th century, teaching became a science with bases and foundations based on the decisions of psychology, educational psychology, education, sociology, educational supervision, management, means and others, where teaching means a planned activity and directed to modify the behavior of learners as a result of experience and experimentation.

The concept of teaching methods:

The concept of teaching methods is a series of organized events that are managed by the teacher in the classroom to achieve the objectives of the lesson and include educational attitudes, activities and use of means according to the steps of the organization to give learners the knowledge, skills and trends desired. The method of teaching is one of the basic elements of the curriculum. It defines the role of the teacher and the learner in the educational process, determines the methods to be followed, the means of educational communication to be used and the activities that are supposed to be carried out to achieve the desired objectives of teaching. This concept applies to the concept of teaching methods with difficulties Learning However, the difference that teaching in the programs of learning difficulties depends on individual teaching mostly because of the need of the learner and its abilities and ways of teaching learning difficulties that are methods of treatment that are used to raise the level of the learner to reach the level of peers in the classroom, and But the preparation of the individual plan and the appropriate teaching method for students with learning disabilities, the teacher should be familiar with the characteristics of the growth of the primary stage in general and the characteristics of students with learning disabilities in particular.
