

13. SECONDARY TABLE:

```
@Entity
@Table(name="emp_tab")
@SecondaryTables(
    @SecondaryTable(name = "emp_child",
        pkJoinColumns=@PrimaryKeyJoinColumn(
            name="eidFk",referencedColumnName="eid")
    )
)
class Employee {
    @Id
    @Column(name="eid")
    int empld;
    @Column(name="ename",table="emp_child")
    String empName;
    @Column(name="esal")
    double empSal
}
```

14. VALIDATIONS:

```
@NotNull(message="Employee Name must not be null")
@Size(min=3,max=6,message="Employee Name must be in 3-6 chars")
@Pattern(regexp="SAT[A-Z]*")
private String empName;
@Min(value=3,message="EmpSal minimum nuber is 3")
@Max(4)
@Column(name="esal")
private double empSal;
@AssertTrue
private boolean isEnabled;
@AssertFalse
private boolean isFinished;
@Past
@NotNull
private Date date1;
@Future
private Date date2;
```
