

7. The principle of elasticity

It must be possible to increase / decrease taxes according to the economic situation in the country. It requires that the government should be able to raise the tax rates when it needs more revenue. Elasticity only deals with tax rates e.g. duty can be raised on the number of commodities and the rate varies based on the governments revenue needs. However, care must be taken to ensure that tax rates are not raised unduly high as this will have adverse effects on the productive capacity of the economy.

8. The principle simplicity

A tax system should be simple and plain to the tax payer i.e. the system should not be complicated. It should be simple to understand as to how it is calculated, the method used in its payment and when is to be paid. This minimizes the chances of corruption on oppression of taxpayers by the tax authority.

9. The principle of diversity

Every tax system should be diverse since a single or a few taxes will neither meet the revenue requirement of the state nor will they be equitable. A society should have a variety of taxes so that all the citizens can contribute towards the state revenue according to their respective abilities to pay.

**Assignment:**

How does the Kenya tax system score against the principles of a good tax system? (20 marks).

**CLASSIFICATION OF TAXES**

Taxes may be classified according to;

### Advantages

- Are not easy to evade since the taxes are included in prices of commodities / services.
- They have a wide coverage since they reach a wider community through the products and services that they purchase.
- They satisfy the principle of convenience since they are paid by the people who have the means to buy only.
- They satisfy the principal of diversity because they are levied on a wide variety of commodities.
- They are less burdensome since they are not felt directly.
- They are flexible since the rates can be applied selectively.
- They help in checking consumption of harmful goods.

### Disadvantages

- They are not equitable because they negate the principle of equity (ability to pay) and therefore they are unjust to the poor.
- They go against the principle of least aggregate sacrifice. This ill effect of indirect taxes can be corrected by heavily taxing luxurious goods. However, such a correction can only be partial and as such cannot provide adequate revenue to the economy.
- These taxes feed inflation. The imposition of heavy indirect taxes tends to raise the prices of commodities which may lead to inflation.
- The lack of civil awareness / consciousness of a person who buys a product on which indirect taxes have been imposed may not know that he is paying taxes to the government.

## 2. **Bases of Tax**

Is the legal description of the object for taxation e.g. the base of excise duty is usually on the production and packaging of a specified goods. The base of income tax is the income of the assesses. The base of each tax has to be defined legally and it is to be quantified for the purpose of determining the tax liability of an individual. A tax base may also have a time dimension e.g. income tax is usually on annual basis of accrual / receipts. The authorities while determining the tax base are expected to give due consideration to various cases like those of:

- a. Cost of collection
- b. Administration
- c. Effects of the tax etc

With the passage of time, a tax base may grow or shrink.

## 3. **Rates of Tax**

Under this classification, taxes can be;

- a). Progressive tax
- c). Digressive tax

|                                 |              |                      |
|---------------------------------|--------------|----------------------|
| Sweepstake winnings             | 5,000        |                      |
| Profit on sale of old furniture | 1,200        |                      |
| Cash gifts while in hospital    | 1,600        |                      |
| Horse race winnings             | <u>4,000</u> | <u>55,000</u>        |
| Net Taxable profit              |              | <u><u>42,000</u></u> |

#### Example 4

Mr. Juma presented the following for the year ended 31<sup>st</sup> December 2019.

|                                    | Kshs."000"   | Kshs."000"          |
|------------------------------------|--------------|---------------------|
| Sales                              |              | 13,000              |
| Less: Cost of Sales: Opening stock | 2,200        |                     |
| Purchases                          | 4,000        |                     |
| Closing Stock                      | <u>(800)</u> | <u>(5,400)</u>      |
| Gross Profit                       |              | 7,600               |
| Other operating incomes            |              | <u>400</u>          |
| Total Income                       |              | 8,000               |
| Less: Expenses                     |              |                     |
| Salary and Wages                   | 2,500        |                     |
| Rent                               | 40           |                     |
| Advertisement                      | 120          |                     |
| Transport                          | 40           |                     |
| Depreciation                       | 75           |                     |
| Interest on loans                  | 450          |                     |
| Commissions paid                   | 96           |                     |
| Printing & Stationery              | 144          |                     |
| Repairs & Maintenance              | 380          |                     |
| Postage & Telephone                | 17           |                     |
| Legal fees                         | 23           |                     |
| Insurance                          | 110          |                     |
| Gifts                              | <u>4</u>     | <u>4,013</u>        |
| Net Profit                         |              | <u><u>3,987</u></u> |

| Patents w/o                                                   | <u>2,500</u>    |
|                                                               | 76,000          |
| Less: Disallowable income included/allowable expenses omitted |                 |
| Dividends (gross)                                             | 5,000           |
| Capital allowances                                            | 30,000          |
| Gain on sale of plant & machinery                             | 10,000          |
| Post bank interest                                            | 6,000           |
| Tax refund                                                    | <u>20,000</u>   |
|                                                               | <u>(71,000)</u> |
| Adjusted Net Profit                                           | <u>5,000</u>    |

### Assumptions

- i. NSSF contributions were the contributions paid by the employer on behalf of the employees.
- ii. Staff service agreements were entered after starting the business hence allowable.
- iii. The lease was capable of going / exceeding 99 years hence disallowed.

Calculation of corporation tax

= 5,000 x 30/100

= Kshs.1,500

### Question:

Millers Ltd is a manufacturing company located at Nairobi's Industrial area. Its profit and loss account prepared from the books of accounts for the year ended 31<sup>st</sup> December 2009 was as follows:

| <u>Expenses</u>          | <u>Notes</u> | <u>Kshs.</u>     |
|--------------------------|--------------|------------------|
| Gross profit             |              | 1,864,000        |
| Investment income        | (i)          | 284,636          |
| Profit on sale of shares |              | <u>216,324</u>   |
|                          |              | <u>2,364,960</u> |
| Directors remunerations  | (ii)         | 1,020,000        |
| Interest expenses        | (iii)        | 273,600          |
| Audit fees and expenses  | (iv)         | 216,000          |
| Dad debts                | (v)          | 158,400          |
| Depreciation             |              | 844,760          |
| Miscellaneous expenses   | (vi)         | 133,600          |
| Net Profit               |              | <u>218,600</u>   |
|                          |              | <u>2,364,960</u> |

### Notes:

|     |                                                   |                  |

Kshs.

**a). In respect of what can a claim be made**

A claim may be made in respect of expenditure incurred in any year of income e.g. Capital expenditure incurred in Kenya by any person carrying on mining operations, expenditure on development, administration and management before production / during a period of non-production.

Qualifying mining expenditures therefore include:

1. Cost of prospecting and exploring the mine.
2. Cost of acquiring rights over the mines and the minerals. This does not include the cost of land.
3. The cost of development, administration and management during prospecting, explorations and during the period prior to the commencement of mining operations and also during periods of temporary stop pages of the miner.
4. The cost of the buildings, machineries and other assets that would have little or no value if the mine ceased to operate.
5. Any other intangible drilling costs.

The deductions are not calculated on time basis.

**b). Who is entitled to claim?**

Paragraph 17(1) provides that a deduction may be claimed by a person carrying on business of mining and who incurs expenditure.

Sub-paragraph (i) provides that where expenditure is incurred by a person about to carry on a business of mining, it shall be treated as having been incurred by him on the first day on which he does carry it on.

**c). What is entitled to claim?**

A person entitled to claim may deduct in computing his gains or profits for any year of income in which he incurs qualifying expenditure, an amount equal to two-fifth of such expenditure, and in each of the following six years an amount equal to one-tenth of the expenditure. Normally the whole of the expenditure is written off over seven years.

**d). Miscellaneous Provisions**

- i. Paragraph 18 provides for the position where assets representing qualifying expenditure change hands during the period when deductions are being giving and empowers the commissioner to make such apportionments but vendor and purchaser as he considers just and reasonable.
- ii. Paragraph 19 provides that separate and distinct mining operations carried on by the same person in mines that are not contiguous shall be treated as separate trades.
- iii. Paragraph 21 provides / imposes a liability to tax upon the vendor of assets representing expenditure where under paragraph 20 (2) the purchaser is deemed to have incurred expenditure equal to the price paid by him for such assets.

## INDUSTRIAL BUILDING DEDUCTION (IBD)

Is a special deduction that is granted in respect of capital expenditure on industrial buildings as per the second schedule of the ITA which states "Where a person incurs capital expenditure on the construction of an industrial building and the industrial building is used for business carried on by the person / the lessee, a deduction called IBD shall be made in computing the persons gains / profits from the business".

### Rates of IBD

- The standard rate of 2½% of the qualifying cost per year on the straight line basis (the life of an industrial building is usually estimated at 40 years)
- Where a tax payer considers that the life of an industrial building is less than 40 years, he can apply to the CIT for an accelerated rate, i.e. a rate higher than 2½% if the CIT agrees, this shall be the rate of IBD for that person.  
The life of an industrial building may be less than 40 years due to the type of construction / the use to which the building is put.
- In case of hotel buildings certified by the CIT to be industrial buildings under the act and gazette in the official Kenya Gazette, the rate of IBD is 4% of the qualifying cost of 25 years on the straight line basis.

***Note: Effective 1<sup>st</sup> January 2010, the rate shall be 10% for 10 years on a straight line basis.***

### Industrial Building

Is a building in use on;

- a. For the purpose of business carried on in; milling factory / any other purpose e.g. soap making, juices, biscuits, detergents manufacturing, beer making, posho mills etc.
- b. For the purpose of transport e.g. docks, tunnels, electricity and hydro-powers undertakings.
- c. For the purpose of business which consist of manufacture of goods / materials or subjection of goods to any process.
- d. For the purpose of business which consists of the storage of goods / materials;
  - ▶ Which are to be used in the manufacture of other goods / materials.
  - ▶ Which are to be subjected in the course of any business to any process.
  - ▶ Which having been manufactured / subjected in the course of business to any process have not been delivered to the purchaser.
  - ▶ On arrival by sea / air in to any port of Kenya e.g. container depots at Embakasi, Kisumu, Mombasa and Eldoret, go-downs, warehouse and stalls owned by clearing and forwarding agencies.
  - ▶ For the purpose of a business consisting of; ploughing / cultivating agricultural land but not by the farmer. These are buildings that are used by agricultural contractors.
  - ▶ For the purpose of a business which may be declared by the minister for finance in the Kenya Gazette as an industrial building.

## Qualifying Cost for IBD – Refer ID (they are the same)

### Additional Notes

- a) Where an industrial building is used for part of an accounting year, the annual IBD will be used / reduced proportionally to the period it was used. Similarly, where a building is used for more than 12 months, the IBD will be extended proportionally to the period it was used. However, where a fraction of a month is involved, the whole month's IBD shall be granted.
- b) Where a building in use is sold and continues to be used as an industrial building by the purchaser or its lessee, the new owner will inherit the residue of expenditure not yet claimed by the former owner, thus the price paid for such a building (purchase price) shall be irrelevant for the purposes of IBD to the purchaser.
- c) Where a building is sold before use:
  - ❖ By the person other than the builder (contractor), the qualifying cost of the buyer shall be the lower of the price paid and construction cost.
  - ❖ By the builder, the qualifying cost shall be the price paid.
  - ❖ To more than one person, the last price shall be the qualifying cost of IBD.
  - ❖ Where a building has been put to use and subsequently dis-used and then used again for the purposes of determining the residue of expenditure and national IBD is computed in respect of the dis-used period.

**As from 1<sup>st</sup> January 1987, IBD is computed on the residue after ID.**

### Example1

Mr. Samuel Tumbo is the owner of a company manufacturing nails in Kisumu. He started his business on 1<sup>st</sup> January 2004 when the qualifying ID was 60%. In the course of operating his business, he incurred the following expenditure:-

|                                                      | Kshs.     |
|------------------------------------------------------|-----------|
| Purchase of land from Kisumu City Council (2004)     | 4,000,000 |
| Buildings (including an office of Ksh.850,000)- 2004 | 8,000,000 |
| Purchase of motor vehicles (2007)                    | 6,000,000 |
| New Machinery (2008)                                 | 4,000,000 |
| Tractor and Trailer (2006)                           | 800,000   |
| Security wall (2004)                                 | 6,000,000 |

Required:

Calculate ID and IBD for the year 2008 only.

The second schedule paragraph 7 states “Where during the year of income, machinery held by a person is used by the person for the purpose of his business, there shall be made in computing the persons gains / profits and deduction referred to as wear and tear deduction.

**Note:**

1. Wear and tear deduction is granted in respect of machinery.
2. The person must own such machinery.
3. The machinery must be used by the person for business.
4. The machinery must be used anytime in the year of income.

### **Machinery**

For the purpose of wear and tear deductions, the term machinery though not defined by the Act has been given a very wide meaning. It will include and other forced asset other than land, buildings and loose tools, e.g. Computers, printers, motor vehicles, tractor, combined harvester, bicycles etc. For the purpose of wear and tear deduction machinery are classified into four classes or pools (with effect from 1st January 2010). The aggregation of machinery for the purpose of wear and tear deductions is referred to as pooling of machinery. Each class will be granted wear and tear deduction on a give percentage and this is granted on the reducing balance basis.

### **Class / Pool for wear and tear deduction**

**Class I- 37½%:** This is the class of heavy class machinery and moving harvesters, cranes, trailers, lorries (Zor=3 tonnes), forklifts, trains, breakdowns buses.

**Class II- 30%:** This class was introduced in respect in respect of the office machinery and equipment brought owned and used in term 1992, the machinery include; computer hardware, photocopier, fax machines, telephone duplicating machines, calculator, typewriters, rate's etc.

**Class III- 25%:** This was introduced with effect from 1<sup>st</sup> January 2010. This only covers aircrafts.

**Class IV- 25%:** Class of all other self propelling machinery e.g. lorries (less than 3 tonnes) saloon cars/ motor vehicles (if not commercial a limited notional cost of Kshs.2m as a maximum).

**Class V- 20%:** Introduced with effect from 1<sup>st</sup> January 2010 and will cover telecommunication equipments for telecommunication operators.

**Class VI- 12½%:** Introduced with effect from 1<sup>st</sup> January 2010 and will cover ships.

**Class VII- 12½%:** Class for all other machinery that do not qualify for any other class above e.g. wheelbarrows, cuts, bicycles, trolleys, plant and machinery (residue) office partitions, carpets, neon lights, billboards, shock corners e.t.c

**Class VIII- 5%:** Was introduced with effect from 1<sup>st</sup> January 2010 and include company software.

**Example 2:**

Given below are assets available for Onyango Productions Ltd. on 1<sup>st</sup> January 2019.

|                   | <u>Kshs.</u> |                     | <u>Kshs</u> |
|-------------------|--------------|---------------------|-------------|
| Goodwill          | 200,000      | Mercedes Benz       | 1,320,000   |
| Land              | 8,000,000    | Security Wall       | 400,000     |
| Buildings         | 17,000,000   | Workers' Quarters   | 6,000,000   |
| Tractors          | 1,650,000    | Boilers             | 2,000,000   |
| Lorries (>3 tonn) | 1,970,000    | Sorter and conveyer | 2,400,000   |
| Furniture         | 1,200,000    | Office Equipment    | 1,150,000   |
| Milling Machines  | 12,500,000   |                     |             |

During the year, the following assets were sold:

|                  | <u>Kshs.</u> |                 | <u>Kshs</u> |
|------------------|--------------|-----------------|-------------|
| 1 tractor        | 600,000      | 1 lorry         | 300,000     |
| Furniture        | 250,000      | Milling machine | 1,000,000   |
| Office equipment | 350,000      |                 |             |

The following items were acquired during the year;

|                    | <u>Kshs.</u> |                   | <u>Kshs</u> |
|--------------------|--------------|-------------------|-------------|
| Peugeot 504 saloon | 875,000      | Tractor           | 1,700,000   |
| Delivery van       | 766,000      | An executive desk | 95,000      |
| Office equipment   | 415,000      |                   |             |

**Required:**

Compute the W & TD for Onyango Productions Ltd for the year ended 31<sup>st</sup> December 2019, showing the WDV as at that date and assuming that the opening balances have been agreed by the CII.

**ONYANGO PRODUCTIONS LTD**  
Computation of Wear and Tear Deductions for the year upto 31.12.2019

## **Objections, Appeals and Reliefs in Respect of Errors, Offences and Penalties.**

### **Introduction**

Taxpayers are required to pay tax on their income on the basis of the assessment made on the income. However, if they feel that they have been unfairly assessed, they have the right to object to the assessment made in the prescribed manner to the commissioner of income tax.

### **Objections by Taxpayers**

The taxpayer is required to pay taxes on the income as per assessment either self assessment or originating from the commissioner. However, where one taxpayer feels that the income as per assessment arising from the commissioner is too high he has the right under one, ITA to object such an assessment and an appeal shall be registered for hearing (Note) that a taxpayer will not be allowed to appeal against his / her own self assessment in errors so as to be a relief of error or mistake.

An objection raised by a taxpayer is referred to as a note of objection for such a note to be treated as a valid note of objection it must be;

- ❖ In writing i.e. a taxpayer cannot object orally.
- ❖ It must state the grounds of objection i.e. the reason why one objection is lodged.
- ❖ Within 60 days from the date of service of notice of assessment plus 10 days to give 70 days.
- ❖ The 10 days of service are taken to be one maximum time that mail would have been delivered to any address of Kenya or abroad.

### **Dispute of Notice of Assessment**

A taxpayer can dispute a notice of assessment due to mistakes, errors arising to;

- ▶ The amount of income or loss assessed.
- ▶ The amount of tax payable
- ▶ Allowances or deduction made or omitted to have been made when computing income / loss
- ▶ Imposition of penalties under Section 72 of ITA.
- ▶ Reliefs granted or omitted to have been gained,
- ▶ The date of tax due

- ▶ An assessment is time borrowed (income after 7 years) provided the grounds of objections are clearly stated. The CIT is obligated to register one objection. However, where one grounds of objection are unfolded or not material or not fundamental due to taxpayer lack of knowledge or more arithmetic errors, such matters can be cleared through correspondence between the taxpayer and the commissioner and an agreement shall be struck between objection and the commissioner withdrawing one assessment through an amended assessment.

There are certain instances when one taxpayer will not be able to meet the 60 days deadline in which a notice of objection should be made provided there are good grounds, Section 54 of ITA provides that taxpayers can lodge a late notice of objection. The act will only admit a late objection provided the taxpayer can demonstrate that.

- a) He / she was prevented from objection in time by reason of sickness.
- b) Absence from Kenya.

The local committee consists of 9 members appointed by the Minister for Finance and will consist of;

- ✚ A chairman
- ✚ Not more than 8 other members

The period of office for the local committee is usually 2 years unless;

- ✚ A member tenders a resignation
- ✚ A minister revokes a member's appointment for reasons of;
  - ▶ Fail to attend 3 consecutive meetings (LC) or
  - ▶ A member being unfit to perform duties of his office due to reasons mental or physical disabilities.

### **Local Committee Rules**

The procedure governing the conduct of the local committee are referred to as the Income Tax (LC) rules and they shall be followed in relation to;

1. The manner in which an appeal will be made to a local committee
2. The procedure of hearing an appeal and the records to be kept by the LC
3. The manner in which they convene meetings, the venue, and time to hold a local committee meetings
4. The scale of costs that may be awarded by a local committee.
5. The general matters of carrying out an LC appeal.

A taxpayer has a right to appeal to LC against the CIT decision against him, mainly the CIT refusal to amend an assessment after the taxpayer has lodged a valid notice of objection.

The taxpayer will have;

- a) A right to appeal against such a confirming notice
- b) The CIT may have issued a non-agreed amended assessment
- c) The CIT may refuse to accept late notice of objection
- d) The CIT may issue a notice to taxpayer requiring him to maintain his books of accounts in a specific language
- e) The CIT may refuse to make a refund of taxes.

In the above cases, an appeal may be lodged by a taxpayer to the local committee.

### **Procedure of Appeal (LC)**

1. The taxpayer must notify the CIT of his intention to appeal to the LC giving a notice within 30 days after receiving the notice within 30 days after receiving the notice from the CIT or after receiving the commissioner's decision.
2. A notice of intention of appeal must be copied to the clerk of the LC.
3. Copies of Memorandum of Appeal and a state of facts must be sent to the CIT. the taxpayer should submit the following documents to the clerk of the LC.
  - ▶ Memorandum of Appeal. It will state the grounds of appeal and shall be submitted in original plus 9 copies.
  - ▶ Statement of Facts. Will give the sequence of events which took place regarding the assessment, objection and eventually the appeal. It will give the information of the date of assessment being objected to the date it was confirmed **OR** when a non-agreed amended assessment was issued. Similarly, the statement shall be the original plus 9 copies.
  - ▶ A copy of the letter. The notice of the intention to appeal to the LC, which was sent to CIT.

- ▶ A copy of the CIT's decision. Against which the appeal is being lodged e.g a copy of a non-agreed amended assessment or a copy of confirming notice. When all the appeal documents have been filed in time to the clerk of the LC, the clerk will register the Appeal for hearing. The clerk will not register an appeal for hearing unless the taxpayer is prevented from lodging an appeal in time to the LC for reasons such as Absence from Kenya and sickness or any other reasonable cause.

In this case, the LC can give a taxpayer an extension of time within which to lodge an appeal stating why the appeal was not lodged in the specified time.

## **THE TRIBUNAL**

This is an appeal body established by Minister for Finance by a notice in Kenya Gazette. It consists of;

- ✚ Chairman
- ✚ Not less than 2 and more than 4 other members i.e. min 3 and a max of 5.

The quorum for the Tribunal is the chairman and 2 other members. The tribunal is governed by IC (tribunal) rules.

A tribunal will hear appeals on assessment that are based on the CIT directive under Section 23 and 24 of ICTA.

The commissioner is empowered to reject certain business transactions, where he is of the opinion that they avoid / reduce taxes. He can direct for the necessary adjustment on taxable income and issue an assessment accordingly. If the taxpayer objects and the subsequent assessment, he has the right to appeal to a tribunal e.g. of such taxes which the taxpayer may object to and which the commissioner may feel are suspect are;

- A child being paid very high salaries for performance of minor duties.
- A director of a company buying a car from the company at a throw away price as a trading in.

The commissioner is empowered to reject each transactions and raise an assessment accordingly.

Under Section 24, the CIT is empowered to direct that a company makes a further distribution of dividends. i.e. where the CIT is satisfied that there has been a short fall and where the CIT directs for the distribution the taxpayer can appeal against such kind of direction.

Matters relating to an appeal to a tribunal are normally handed in the head office and once the case has been registered in the respective tax district, the tax payable will be stood over i.e suspended for being paid 1<sup>st</sup> and the relevant offices are informed. The file will be sent to the Head office for further instructions.

Where the taxpayer is not satisfied with the decision of the tribunal, he can make an appeal to the high court by giving a notice within 15 days after he has been served with the decision.
