

- B. Vertebrae
 - C. Clavicle
 - D. Sternum
34. How many vertebrae does an adult spine have?
- A. 33
 - B. 26
 - C. 28
 - D. 37
35. The following muscles assist in raising the mandible, except:
- A. Anterior fibers of temporalis
 - B. Posterior fibers of temporalis
 - C. Masseter
 - D. Medial pterygoid
36. What tendons form the lateral border of the anatomical snuffbox?
- A. Abductor pollicis longus
 - B. Extensor pollicis longus
 - C. Extensor pollicis brevis
 - D. A and C
 - E. A and B
37. What is the deepest thenar muscle?
- A. Abductor pollicis longus
 - B. Abductor pollicis brevis
 - C. Flexor pollicis brevis
 - D. Flexor pollicis longus
38. The surgical No Man's land is located on what zone?
- A. Zone I
 - B. Zone II
 - C. Zone III
 - D. Zone IV
39. Band of deep fascia that holds the long flexor tendons in position at the level of the wrist.
- A. Palmar aponeurosis
 - B. Tendon sheath
 - C. Flexor retinaculum
 - D. Interosseous membrane
40. The following are true about the carpal tunnel, except:
- A. It transports the ulnar nerve and the finger flexor tendons from the forearm to the hand.
 - B. The carpal bones border the carpal tunnel posteriorly.
 - C. It is proximally defined by the pisiform and the scaphoid tuberosity
 - D. It is distally defined by the hook of the hamate and the tubercle of the trapezium
41. The extensor retinaculum is attached laterally at the:
- A. Trapezium
 - B. Scaphoid tuberosity
 - C. Base of the first metacarpal
