

Research Requirements

In order to distinguish between what is true and what is not true, we must always know where the information or data comes from.

In order to do this, we have to understand what paraphrasing is, what quoting is, what in-text citation is and what a references section is:

http://library.senecacollege.ca/Research_Help/Citing_Sources/index.html

The researcher must also note down who the author of the information is when reading an article to determine validity of that source.
