

Environment

- Process
 - When programs are active, they start process. You can view the process with the 'ps' command.
 - 'Kill' command to terminate processes.
 - Use 'cron' to set scheduled processes.
- Tool Kit Management
 - Use the 'apt' package manager to download, install, update, upgrade and search for packages to use.
- Variable, Aliases, Editors
 - Use the 'env' command to display environmental variables.
 - Aliases are a way to add another name for a command or series of commands.
