

Linux Assessment Review

- What is encoding?
- What is decoding?
 - o 'Base64': encode/decode data and print to standard output.
- What tool would produce hexadecimals '-xxd' to make a hexdump or do the reverse.

- How to use 'pwd' present working directory
 - o Tells you where in the file system you are currently located and if you've used a number of 'cd' commands
- How to use heads and tails command
 - o Head command is generally used to display the top(10)lines in a text file. Tail command does the opposite, it shows the last lines in a file
- How to use the 'wc' (word count) command.
 - o It provides an easy way to count the lines, words and characters in a file or in output from other commands.
- How to use the 'uniq' command
 - o It's a command that's very useful when you want to reduce or summarize information
