

4 Agriculture Surplus:

Green revolution helps in increasing agriculture surplus. In Pakistan, green revolution increased agri productivity. Surplus was provided not only to the domestic industry but Pakistan earned foreign exchange by exporting agriculture surplus.

5 Output & Prices Stability:-

G.R helps in stabilizing in agri-prices & output. In the early stage of development prices of industry output was very high. When G.R improved the agri-sector, agro-based manufacturing also improved & agri prices & output were also supported.
