

Types of vehicles

An organisation can choose from a wide range of vehicles:

- Car-vans: smallest class of commercial vehicle*
- Enclosed commercial vans: 'delivery vans'*
- Open topped vans and pick-ups: not widely used for transport of commercial goods*
- Rigid body trucks: large number of models available*
- Articulated trucks: largest class of commercial transport vehicles*

Articulated truck designs

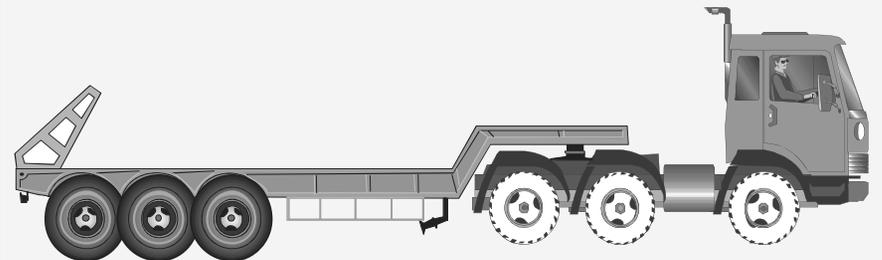

U.S. design 2 axle articulated truck

European design 3 axle truck

- ✦ Separate tractor & trailer units
- ✦ Capacity: 60-75m³
- ✦ The largest class of commercial transport vehicles
- ✦ Many different designs & types

Specialised articulated vehicle

'Artic' detached from its tractor
