

Ques: Production of Beer:

- Beer is defined as a fermented alcoholic beverage from barley, wheat, rice etc.
- Beer is made from the following ingredients:
 - Barley
 - Hops
 - Yeast
 - Water
 - Adjuncts (rice, corn, spices)

* Microorganism:-

Yeast:- Saccharomyces

- Yeast is the microorganism that is responsible for fermentation in beer. Yeast metabolises the sugars extracted from grains which produces alcohol and carbon dioxide, and thereby turns wort into beer.

- Beer is more nutritious than other alcoholic drinks.
