

24- In carpal tunnel syndrome the entrapped nerve is the?

- a-radial
- b-median**
- c-ulnar
- d-axillary.

25- doctors see on patients door word (terminal illness) what does this mean

- a- disease with elderly people
- b- with adult people
- c- Irreversible course**
- d- neurologic origin

26- all of the following are objective measurements used in evaluation except:

- a- time used for performance activity
- b- visual analogue scale**
- c- goniometric ROM
- d- disability decies

B or d

27- Numbness of finger and weakness of flexor digitorum profundus due to lesion of

- a- radial**
- b- ulnar
- c- median
- d- musculocutaneous

28- weakness of which muscle that interfere to climbing stairs and coming from reclined position bringing knee to chest?

- a- quadriceps**
- b- hamstring
- c- flexor digitorum profundus
- d- Quadratus lumborum

i dont find ilio psoas i choose quadriceps

the main muscle responsible for climbing stairs and coming from reclined position bringing knee to chest ?

- a- rectus femoris
- b- iliopsoas**
- c- quadratus lumborum
- d- pectineus

68- pt. is referred to physiotherapist with diagnosis of flexion deformity of Rt knee with examination we will found

A- flexion knee +planter flexion +shortening of qudriceps

B- flexion knee +dorsi flexion +shortening of hamstring

C- flexion knee +no ankle changes +shortening of quadriceps

D- flexion knee +planter flexion +lenghing of soles

69- 764-what of these statement not parameters of functional skeletal muscle function

A-balance

B-produce force

C-Joint mobility

D-endurance

a or c

70- the surgical incision starts from the 3rd vertebrae thoracic until Inferior angle of the scapula then passes behind the scapula up to anterior of shoulder which muscle do not be cut

a-Serratus ant

b-Gd dorsal

c-Rhomboid

d-Subscapularis

السؤال ذا بدو كثير بر صر ز ا ا ناه لت اسهلو هو اطول من هاك

I choose (A) 'a' is letter but after seeing the anatomic of 4 muscles .the answer is (D)
