

Assignment #1:

Write a reflection paper on the importance of music education and teaching.

I believe that music education is essential for all students, since it can improve and develop their skills. Teaching music to students can help them improve and develop their language skills. With music's varied sounds and lyrics, students are exposed to a large amount of vocabulary in a short amount of time. And other thing is that, music provides exposure to other languages and it creates a foundation for the student's ability to understand and communicate in different languages. It can also develop students' memorization skills. Because aside from song lyrics, students must memorize all aspects of music when preparing for a performance and must recall rhythms, pitches, dynamics, and several other elements all at once.

Music education is also beneficial, music transcends the limits of language and in music there is no language barrier which can bring people together regardless of ethnicity or background.
