Architecture, Art, Performance and Design

Writing Assignment #1

1.) Please list your top three goals for your freshman year.

- a. I want to strive for all A's in all of my classes.
- b. I want to consistently create more art this year and the next.
- c. I want to find a job on either campus or outside of campus.

2.) In a 200-word essay please describe how and why you selected these goals.

I selected these goals because I have high hopes and expectations for this year and the years ahead. I selected these goals because I'm becoming a young adult and I'm responsible for my actions now. I'm an optimist and I truly believe that these goals will be easy to achieve. I know that it's possible to dream big and watch that dream become a reality. However, work ethic needs to be on point or consistent to actually see this dream come alive. How I selected these goals was simple. I've already accomplished all A's before in high school. I know that I can achieve that again in my college experience. I haven't been consistent with my art and that's why I chose to add that as my goal. I have been absent from my art ever since the Pandemic began. I became a different person. I became sluggish and had no inspiration to sketch. I finally got back into my groove of things in the middle of 2021. I am proud of myself. The third goal is to find a job. I have always wanted a job but I feel as though I will be clumsy at what I do at said job. I have a few skills but will these skills work for the jobs ahead? I hope so. Thank you for reading!
