

The Game of Black Money |

#FinancialEducation

Pushkar Raj Thakur: Business Coach

This black money game does not seem to stop in India at the moment, and it is increasing. it did not stop even after bringing GST. The government is happy with it, but people are not happy in it.. then you will say that if they will not pay tax, they will take them from home.. There is a concept in the market which is fake billing. fake billing means that the goods have not arrived. only the bill has been cut. now This company is giving a bill to balaji, This company took a bill from the B company. this fake company cuts the bill of 10 thousand crores. now it does not pay GST at all. there is no GST paid here, no tax, no GST given. the game is that GST on Rs 10,000 crore has not come, that is government 's loss.. Is government 's loss.
