

solution to my friend Peter's math problem but it's not going to be easy for him to do it. It is going to have to be really careful. It doesn't make any mistakes because if it does then it might not be able to solve the math problem correctly. So this is an interesting solution, but it's not the only solution that Chat GPT might give me for this type of story. Another possible solution might be divide the number by two and then add the number that you divide by two.

This is going to be the solution to my friend Peter's math problem, but again it's not going to be easy for him to do it. He's going to have to be really careful. He doesn't make any mistakes because if he does, then he might not be able to solve the math problem correctly. So there are a lot of different possible solutions that Chat GPT might give me for a story like this and each one of them can provide different insights into the story itself, so it can be really helpful when trying to come up with a story like this another thing that Chat GPT can help with is providing prompts for characters in your story so let's take a look at an example.

Here. I want to do a story about my friend Peter and his problem with Math and I've put in an option here that says character name. And then I'm Gonna provide a few possible names for my friend Peter's problem with math, so we could have things like multiplication, anxiety or even worst case scenario math disaster so let's take a look at one of these names. First here. We have
