

bigger. Some cases, the gel is prepared in a gradient fashion and in some part of the gel it gradually increases or decreases in concentration. These types of gels are used for different purposes.

The polyacrylamide gel electrophoresis or sds page principle is known as twodimensional gel electrosis or 2d gel electrocoresis. The proteins from a mixture that is known to be known as a mixture known as 2d gel electrophoreis will be talked about later in the other video.
