vendors, and purchasers. All parties in the chain must have a thorough understanding of how their individual sports interact with one another and impact the overall performance of the supply chain.

- PACKAGING:

The quality and safety of their products is their top priority. Here are just some of the steps we take to ensure that the Nestlé products you buy are safe to consume.

- MATERIALS:

Starting with farmers and suppliers, they take a comprehensive approach to food safety. To ensure that they select safe, high-quality raw materials, they implement stringent procurement and auditing procedures. This includes creating standards for the materials they use and conducting checks to guarantee that they always meet the most stringent rules and scientific knowledge. they will reject them if they do not comply.

- PREPARATION:

Their factories are all built according to precise procedures, including those for a clean and safe water supply, for air filtration, and for any material that will meet food, to guarantee that the materials, equipment and manufacturing environment are all designed to produce safe products.

- PACKAGING AND TRANSPORTATION:

When products are released from the factory, we make sure they reach their destination in optimum condition. For chilled or frozen products, this also means ensuring they are stored and transported at the correct temperature.

Packaging is critical in ensuring that our products reach consumers in good condition. It also includes detailed instructions on how to prepare, store, and use the product, as well as information on ingredients and allergen risks. We ensure that best-before and use-by dates are accurate so that customers know when a product is past its prime and no longer safe to consume. This also reduces the amount of garbage produced.

- DISTRIBUTION CHANNEL:

Nestlé company distributor are recruited from different areas. The distributor has their own sales force and vehicles which supply the product to the wholesaler and retailer in the specific area for which the distributor is recruited. The supply the product to the customer by order booking or on the spot selling.
