

Some Amazing Python Programs - The Power of Python

100 Days Of Coding series is that many new features have come in Python. And a lot of new approaches which I want to tell you. After seeing those programs you'll know the actual use of programming. I 'll teach you Python so well just as a Snake Charmer hypnotizes the snake You can hypnotize the Python while programming You 'll be able to do whatever you want. The next program I 'm going to show you is. . . It 's Face Recognition Program which uses Haar Cascade Algorithm. It tells where 's the face in an Image it is a face detection algorithm. The next project is Flappy Bird Game which uses random module in which it 'll tell the love percentage between 2 people I want to give you all these codes I want you to run these codes in your system If you 're able to run or not that is a different thing. I hope you wo n't face any problem while running these codes. As we 'll progress in this course you 'll be able to do this more easily.
