

HOW I Learned Python in 30 Days? BEST Python Course

Ishan Sharma

i'm ishaan sharma exactly 2.5 years ago i picked up python as my first programming language and i learned it completely in just 30 days in this video i want to talk about exactly what resources i used how did i practice python and what projects i built at the end of all of my learnings. After learning about python and building projects in it i went on to teach it to hundreds of school students. You learn about declaring functions with the help of the def keyword you learn about the return statement. You also learn about all of the basic concepts related to building your own function in python. The good part is that you'll also be having plenty of quizzes to go through and a lot of exercises are shared with you right in this complete course. Coding ninjas is coming up with a scholarship test where you can get up to 100 scholarship on all of their courses. Everyone who signs up for this test will get amazing benefits like a 1500 rupee interview preparation book for completely free the test is happening on the 20th and 21st february 9 pm.

i spent about three to four hours every single day on this course to learn about python programming language and i was able to complete it in a span of 30 days. This is basically the whole course i learned a lot from this course itself and of course i got myself the certificate of this course as well which can be useful. Once i learned about python and all the underlying concepts i built a variety of different projects with the help of python which is a really important skill for every developer out there i hope that this video helps motivate you go out there learn as much as possible. The same instructor jose portilla also has courses on machine learning and data science that you can check out. The video was created using python to learn machine learning and data science in python. The video is the latest in a series of tutorials on machine learning. The videos are available on YouTube and Google Play to learn how to use python in python and other python courses that are regularly updated so do take a look at this.
