<title>My Web Page</title>

</head>

<body>

<h1>Welcome to My Web Page</h1>

<p>This is my first web page.</p>

<h2>About Bass Fish</h2>

<p>Bass fish live in lakes.</p>

</body>

</html>
```

Save the file as "test.html" on your desktop and open it in a web browser to see the result.

Exploring HTML Tags

HTML has many tags that can be used to format text, create links, and add images, among other things. This tutorial only covers the basic structure of an HTML document, but there are many resources available online to learn more.

Testing Your HTML

To test your HTML, you can simply open the file in a web browser by double-clicking on it. Later on, we will cover how to upload your HTML files to a web server so that they can be accessed by others on the internet.

Conclusion
