

HTML Tutorial for Beginners - 02 - Line breaks, spacing, and comments

EJ Media

Okay, welcome to your second tutorial on beginning HTML. Today, we're going to look at adding line breaks, comments, and spaces to your HTML code.

If you followed the last video, we're going to use the HTML file we created in that video. Let's open it up and take a look at the code.

Adding Line Breaks

We want to add some space between the sections of our HTML. To do this we need to use the `<br>` tag. Let's add three line breaks between the sections

Adding Comments

Comments are used to keep notes in your HTML code that won't be displayed on your web page. To add a comment, use `<!--` at the beginning and `-->` at the end of the comment. Let's add a comment to the start of our HTML code for the second section.

Adding Spaces

To add additional spaces between text, use the ` ` HTML entity. You can stack multiple ` ` to add more spaces. Let's add some spaces between "test" and "test".
