

THE BIG FAMINE PROBLEM

Camila Aguilar Hernández, María José Daza Ramírez, Andrea Covarrubias Marín.

Description of the problem:

Hunger and malnutrition make people less productive and more prone to disease, so they are often unable to increase their income or improve their livelihoods. Although the famine situation affects many areas of Guerrero, the main municipality in which the highest indices of food vulnerability have been reported is Malinaltepec, according to the report of the Ministry of Well-being, which is why we chose this area. One of the main reasons why this problem is caused is that Malinaltepec is located between mountains, so it is an area with difficult access, for this reason it is difficult to transport food, adding to this that most of the population located in this area lives in extreme poverty.

Research question:

What are the main reasons why food does not arrive and what are some solutions?

Background/ Previous jobs:

1. Work title

Municipios de la montaña de Guerrero recibirán recursos extraordinarios de 100 mdp para la construcción de caminos.

What did you do at work?

100 million pesos per year will be allocated to each of the 21 municipalities that make up this region to be used in the construction of roads with the same members of the communities.

What were your results?

Authorized the Ministry of Well-being resources to integrate 10,000 more producers to the Sembrando Vida program in La Montaña de Guerrero, bipartite investment of 500 million pesos more to expand the universal pension to people with disabilities in Guerrero.

How does this work contribute to your research?

Allows us to see the forms of aid from the Mexican government.

2. Work title

Tlapanecos de Guerrero.
