

Illuminati

Shockingly, the Illuminati has a real historical foundation. In 1776, in Bavaria, Germany, a German professor named Adam Weishaupt formed an organization called the Order of the Illuminati. This group focused on self-knowledge, self-improvement, social reform, and free thought. However, conservatives saw it as a threat to the church and the Illuminati was eventually stopped and criminalized.

But some people believe that the Illuminati survived and evolved. They think that it is part of a new world order, seeking to create a dominant one-world totalitarian government. In fact, a national poll revealed that 28 percent of voters believe in the possibility of a new world order.

There are various theories about who is in the new world order. Some believe it's the US government, the UN, and other international organizations. Others think that world leaders are shape-shifting wizards, lizard elite who feed off the human race.

Some even connect the new world order to Satanism and believe that it is responsible for major historical events.

Additionally, there are conspiracy theories about celebrity clones being used to brainwash society. While many conspiracy theorists believe that major celebrities are part of the Illuminati, these claims have been denied by the celebrities themselves.

Overall, the Illuminati remains a fascinating topic of discussion, with various theories and beliefs surrounding it.

'''html

Mess, and here's an excerpt from Jay-Z's verse in a song Free Mason: "I said I was amazing, not that I'm a Mason. I'm red hot, I'm on my third six, but a devil I'm not." Other celebrities include Kanye West, who owns a necklace containing the symbol of the Eye of Horus, which is associated with the Illuminati and also seen on the dollar bill. Kanye's interruption of Taylor Swift at the 2009 Video Music Awards was said to be a method of initiating Taylor Swift into the Illuminati by humiliating or hazing her. However, here's a quote from Kanye on the Illuminati: "I'm tired of people pinpointing musicians as the Illuminati. That's ridiculous. We don't run anything; we're celebrities." Other celebrities that have been accused of being in the Illuminati include Lady Gaga, Rihanna, Madonna, and Katy Perry, just to name a few.

Keep in mind that it's pretty easy to make a claim that somebody is in the Illuminati. Hell, quickly perusing my coworker Quinta Brunson's Instagram feed, I could see several references to the Illuminati. Just looking through the pictures, yeah, there's even a picture where I myself make the Rockefeller sign, in one of her pictures, and it was quickly called out by a comment, Illuminati confirmed. She also seems to be absent from her desk quite frequently, perhaps to attend to Illuminati affairs. What if you're in the Illuminati? Look, I am not in the Illuminati. "wink" I am not in the Illuminati, Quinta's not in the Illuminati, you may be. It is pretty hard to get into.

And on that note, I'd like to point to a website called IlluminatiOfficial.org and on that site, there's a page called "Join the Illuminati". A very fascinating proposition indeed. So I reached out for an interview and here's what I got back from their Public Relations Director. Here's what the alleged Illuminati PR Director wrote back in response to my interview request: "Unfortunately, members of the Illuminati are not currently available for on-camera interviews." She also mentioned, "There are many misconceptions about my client's organization," and referred me to the website's beliefs section, which is abstract and quite interesting to say the least.

Let's visit the professor one more time. I guess the last question would be, what percentage would you put on that the Illuminati is actually a real thing? Well, it was a real thing back in 1780, but it's not a real thing anymore. I would say 100 percent, it's not a real thing. Most of the conspiracy theories make this crazy leap at some point, where you're following the trail of evidence and it makes sense and it makes sense and it makes sense, and suddenly, it's crazy. I could see a world where sometimes things go beyond science or fact, that leap of faith is what you need to make, to get to the truth. Maybe that's just the crazy person inside me.

Here's the thing, I saw the look on her face when I mentioned that, she did not look pleased. Am I gonna say outright the Illuminati is a real thing? No, I'm not gonna say that but, is it possible? Yeah, it's possible, why not? The fact that there could be some all-knowing organization under everything. Are they skypeing, how are they meeting, where are they meeting? They're like, "Oh, let's just meet in Toledo this year" - Laughter - At the Radisson. We've angered them again. Yeah. Don't talk about Toledo. - Laughter - The point I'm saying is, nothing's impossible. Sometimes you just gotta look at something with an open mind, it may seem crazy on the surface and I will admit, this all looks crazy. So it is possible that there's an organization founded by lizard people, who regularly abduct and clone celebrities. I'm not saying saying there's lizard, ah fuck that is what I'm saying. Say lizard people out loud. - Ryan: No. - Shane: Yeah. - Ryan: No - Laughs - Own it, Ryan, say lizard people out loud

this all day but regardless, the existence of the Illuminati will remain unsolved
