

TCT	Thyrocalcitonin
PTH	Parathyroid
CCK	Cholecystokinin
GIP	Gastric Inhibitory Peptide

IMPORTANT CELLS	
Goblet cells	Present in intestinal mucosal epithelium which secrete mucus
Mucus neck cells	Present in gastric gland & secrete mucus
Peptic/cheif cells	Present in gastric gland & secrete pepsinogen
Parietal/oxyncic cells	Present in gastric gland & secrete HCl & intrinsic factor
Hepatic cells or hepatocytes	Found in liver
JG (Juxtaglomerular) cells	Release renin & erythropoietin hormones
Neurosecretory cells	found in hypothalamus, which secrete hormones.
Ganglion cells	Found in retina
Bipolar cells	Found in retina
Photoreceptor cells	Found in retina
Rod cells	For twilight (scotopic vision)
Cone cells	For day light (photopic vision)
Organ of Corti	contains hair cells
Podocytes	The epithelial cells of Bowman's capsule
