

DO'S & DON'TS OF TURBINE OPERATION (BEFORE START UP)

1. Check the oil pressure to the bearings before every start up.
2. Check for auto start of AOP/EOP once in shift.
3. Check up the start of opening and full lift of the servomotor.
4. Apply molykote to all moving parts to avoid jamming.
5. WWG- ensure manual knob is in min. position.
