

You have a Windows Server Azure virtual machine named VM1. You need to back up two folders in VM1 by using Azure Backup. The solution should minimize administrative effort. What should you deploy first?

Select only one answer.

Azure Backup Server

Recovery Services agent *****

Microsoft Monitoring agent

Windows Server Backup role

You have an Azure virtual machine named VM1. VM1 contains the following: a File named File1 that is stored on volume C:\ a File named File2 that is stored on volume D:\ an App named App1 that is in a running state a user named User1 that is connected to VM1 You plan to resize VM1. What is preserved after the resize?

Select only one answer.

File1 and File2 only *****

File1 and the state of App1 only

File1, File2 and the state of App1 only

File1, File2, the state of App1 and the connection of User1

File1 only

You have an Azure subscription. You plan to use fault domains. From which Azure resource can you configure the fault domains?

Select only one answer.

Availability set *****

Virtual machine

Virtual machine scale set

Virtual network

You have an Azure subscription that contains the following resources: A resource group named RG1 in the West US region A resource group named RG2 in the Central US region A virtual network named VNet1 that is deployed to the West US region in RG1 A virtual network named VNet2 that is deployed to the Central US region in RG1 A virtual network named VNet3 that is deployed to the West US region in RG2 You need to deploy a virtual machine named VM1 to RG1 in the West US region. To which virtual network or virtual networks can you connect VM1?

Select only one answer.

VNet1 only *****

VNet1 or VNet2 only

VNet1 or VNet3 only

VNet1, VNet2 or VNet3

You have an Azure subscription. You plan to run a data warehouse in an Azure virtual machine named VM1. You need to ensure that VM1 is optimized for running a data warehouse. Which VM type should you use for VM1?

webapp1-prod---Production
webapp1-test---Staging

In webapp1-test, you test several changes to App1.

You back up App1.

You swap webapp1-test for webapp1-prod and discover that App1 is experiencing performance issues. You need to revert to the previous version of App1 as quickly as possible.

What should you do?

- A. Redeploy App1
- B. Swap the slots
- C. Clone App1
- D. Restore the backup of App1

B

QUESTION 33

Note: This question is part of a series of questions

You have an Azure subscription that contains 10 virtual networks. The virtual networks are hosted in separate resource groups.

Another administrator plans to create several network security groups (NSGs) in the subscription. You need to ensure that when an NSG is created, it automatically blocks TCP port 8080 between the virtual networks.

Solution: From the Resource providers blade, you register the Microsoft.ClassicNetwork provider.

Does this meet the goal?

- A. Yes
- B. No

B

QUESTION 34

Note: This question is part of a series of questions

You have an Azure subscription that contains 10 virtual networks. The virtual networks are hosted in separate resource groups.

Another administrator plans to create several network security groups (NSGs) in the subscription. You need to ensure that when an NSG is created, it automatically blocks TCP port 8080 between the virtual networks.

Solution: You assign a built-in policy definition to the subscription.

Does this meet the goal?

- A. Yes
- B. No

B

QUESTION 35

You have an app named App1 that runs on two Azure virtual machines named VM1 and VM2.

You plan to implement an Azure Availability Set for App1. The solution must ensure that App1 is

You have an Azure subscription named Subscription1 that contains a resource group named RG1. In RG1, you create an internal load balancer named LB1 and a public load balancer named LB2. You need to ensure that an administrator named Admin1 can manage LB1 and LB2. The solution must follow the principle of least privilege.

Which role should you assign to Admin1 for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To add a backend pool to LB1

- A. Contributor on LB1
- B. Network Contributor on LB1
- C. Network Contributor on RG1
- D. Owner on LB1

To add a health probe to LB2:

- A. Contributor on LB2
- B. Network Contributor on LB2
- C. Network Contributor on RG1
- D. Owner on LB2

BB

QUESTION 40

Hotspot Question

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table:

(see pdf)

User3 is the owner of Group1.

Group2 is a member of Group1.

You configure an access review named Review1 as shown in the following exhibit: (see pdf)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

STATEMENTS

User3 can perform access review of User1

User3 can perform access review of UserA

User3 can perform access review of UserB

- A. Yes to All
- B. Yes No Yes
- C. No to all
- D. No Yes Yes

A

DC

QUESTION 43

Hotspot Question

You have an Azure subscription named Subscription1.

In Subscription1, you create an Azure file share named share1.

You create a shared access signature (SAS) named SAS1 as shown in the following exhibit: (see pdf)

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If on Sept. 2, 2018, you run Microsoft Azure Storage Explorer on a computer that has an IP address of 193.77.134.1, and you use SAS1 to connect to the storage account you [answer choice]

- A. will be prompted for credentials
- B. Will have no access
- C. will have read, write, and list access
- D. will have read-only access

If on Sept. 10, 2018, you run the net use command on a computer that has an IP address of 193.77.134.50, and you use SAS1 as the password to connect to share1, you [answer choice]

- A. will be prompted for credentials
- B. Will have no access
- C. will have read

BC

QUESTION 44

Hotspot Question

You have Azure subscription that includes following Azure file shares: (see pdf)

You have the following on-premises servers: (see pdf)

You create a Storage Sync Service named Sync1 and an Azure File Sync group named Group1. Group1 uses share1 as a cloud endpoint.

You register Server1 and Server2 in Sync1. You add D:\Folder1 on Server1 as a server endpoint of Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

share2can be added as a cloud endpoint for group1

E:\Folder2 on Server1 can be added as a server endpoint for Group1

D:\Data on Server2 can be added as a server endpoint for Group1

- A. Yes to all
- B. Yes Yes No
- C. No to all
- D. No Yes Yes

of Vault1? To answer, select the appropriate options in the answer area.

Storage accounts:

- A. storage1 only
- B. storage2 only
- C. storage3 only
- D. storage1, storage2, storage3

Log Analytics workspaces:

- A. Analytics1 only
- B. Analytics2 only
- C. Analytics3 only
- D. Analytics1, Analytics2, Analytics3

CC

QUESTION 50

Hotspot Question

You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1.

You install and configure a web server and a DNS server on VM1.

VM1 has the effective network security rules shown in the following exhibit: (see pdf)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Internet users...

- A. can connect to only the DNS server on VM1
- B. can connect to only the web server on VM1
- C. can connect to the web server and the DNS server on VM1
- D. cannot connect to the web server and the DNS server on VM1

If you delete Rule2 Internet users...

- A. can connect to only the DNS server on VM1
- B. can connect to only the web server on VM1
- C. can connect to the web server and the DNS server on VM1
- D. cannot connect to the web server and the DN

BC

QUESTION 51

Hotspot Question

You have an Azure subscription that contains a virtual machine scale set. The scale set contains four instances that have the following configurations:

- Operating system: Windows Server 2016
- Size: Standard_D1_v2

- B. Azure Analysis Services
- C. The AzurePerformanceDiagnostics extension
- D. Azure HDInsight

A

QUESTION 70

You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1.

You have a computer named Computer1 that runs Windows 10. Computer1 is connected to the Internet.

You add a network interface named Interface1 to VM1 as shown in the exhibit (see pdf)

From Computer1, you attempt to connect to VM1 by using Remote Desktop, but the connection fails.

You need to establish a Remote Desktop connection to VM1.

What should you do first?

- A. Start VM1.
- B. Attach a network interface.
- C. Delete the DenyAllOutBound outbound port rule.
- D. Delete the DenyAllInBound inbound port rule.

A

QUESTION 71

You plan to automate the deployment of a virtual machine scale set that uses the Windows Server 2016 Datacenter image.

You need to ensure that when the scale set virtual machines are provisioned, they have web server components installed.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. Modify the extensionProfile section of the Azure Resource Manager template.
- B. Create a new virtual machine scale set in the Azure portal.
- C. Create an Azure policy.
- D. Create an automation account.
- E. Upload a configuration script.

AE

QUESTION 72

You have an Azure subscription that contains a virtual machine named VM1. VM1 hosts a line-of-business application that is available 24 hours a day. VM1 has one network interface and one managed disk. VM1 uses the D4s v3 size. You plan to make the following changes to VM1:

Change the size to D8s v3.

Add a 500-GB managed disk.

Add the Puppet Agent extension.

Attach an additional network interface.

Which change will cause downtime for VM1?

- A. Add a 500-GB managed disk.

- B. Attach an additional network interface.
- C. Add the Puppet Agent extension.
- D. Change the size to D8s v3.

D

QUESTION 73

Note: This question is part of a series

You have an Azure virtual machine named VM1. VM1 was deployed by using a custom Azure Resource Manager template named ARM1.json.

You receive a notification that VM1 will be affected by maintenance. You need to move VM1 to a different host immediately.

Solution: From the Redeploy blade, you click Redeploy.

Does this meet the goal?

- A. Yes
- B. No

A

[We have an expert-written solution to this problem!](#)

QUESTION 74

Note: This question is part of a series

You have an Azure virtual machine named VM1. VM1 was deployed by using a custom Azure Resource Manager template named ARM1.json.

You receive a notification that VM1 will be affected by maintenance. You need to move VM1 to a different host immediately.

Solution: From the Overview blade, you move the virtual machine to a different resource group.

- A. Yes
- B. No

B

QUESTION 75

You have an Azure subscription that contains the resources in the following table.

NAME---TYPE

ASG1---Application Security group

NSG1---Network Security Group (NSG)

Subnet1---Subnet

VNET1---Virtual Network

NIC1---Network Interface

VM1---Virtual machine

Subnet1 is associated to VNet1. NIC1 attaches VM1 to Subnet1.

QUESTION 92

Note: This question is part of a series

You have an Azure subscription named Subscription1. Subscription1 contains a resource group named RG1. RG1 contains resources that were deployed by using templates. You need to view the date and time when the resources were created in RG1.

Solution: From the RG1 blade, you click Automation script.

Does this meet the goal?

A. Yes

B. No

B

QUESTION 93

Note: This question is part of a series

You have an Azure virtual machine named VM1. VM1 was deployed by using a custom Azure Resource Manager template named ARM1.json. You receive a notification that VM1 will be affected by maintenance. You need to move VM1 to a different host immediately.

Solution: From the Overview blade, you move the virtual machine to a different resource group.

Does this meet the goal?

A. Yes

B. No

B

[We have an expert Microsoft solution to this problem!](#)

QUESTION 94

Note: This question is part of a series

You have an Azure virtual machine named VM1. VM1 was deployed by using a custom Azure Resource Manager template named ARM1.json. You receive a notification that VM1 will be affected by maintenance. You need to move VM1 to a different host immediately.

Solution: From the Update management blade, you click enable.

Does this meet the goal?

A. Yes

B. No

B

QUESTION 95

You have an Azure Active Directory (Azure AD) tenant named contosocloud.onmicrosoft.com. Your company has a public DNS zone for contoso.com. You add contoso.com as a custom domain name to Azure AD. You need to ensure that Azure can verify the domain name.

Which type of DNS record should you create?

A. PTR

B

QUESTION 99

Your company's local environment consists of a single Active Directory Domain Services (AD DS) domain. You plan to offer your users single sign-on (SSO) access to Azure-hosted software-as-a-service (SaaS) applications that use Azure Active Directory (Azure AD) authentication.

The tenant's current domain name is companycom.onmicrosoft.com.

You need to configure Azure AD to use company.com, the organization's owned public domain name. What should you do?

- A. Add a company.com user principal name (UPN) suffix to the AD DS domain.
- B. Run Azure AD Connect from a domain member server and specify the custom installation option.
- C. Remove the companycom.onmicrosoft.com domain name from the Azure AD tenant.
- D. Add a DNS verification record at the domain registrar.

D

QUESTION 100

Drag and Drop Question

You have an Azure subscription that contains a storage account.

You have an on-premises server named Server1 that runs Window Server 2016.

Server1 has 2 TB of data.

You need to transfer the data to the storage account by using the Azure Import/Export service.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- A. Attach an external disk to Server1, and then run waimportexport.exe
- B. From Azure portal, create an import job.
- C. Detach the external disks from Server1 and ship the disks to an Azure data center
- D. From Azure portal, update the import job.

ABCD

QUESTION 101

Hotspot Question

You have an Azure subscription named Subscription1.

In Subscription1, you create an Azure file share named share1.

You create a shared access signature (SAS) named SAS1 as shown in the following exhibit. (see pdf)

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If on Sept. 2, 2018, you ran Microsoft Azure Storage Explorer on a computer that has an IP address of 193.77.134.1, and you use SAS1 to connect to the storage account, you [answer choice]

- A. will be prompted for credentials

QUESTION 108

Hotspot Question

You have an Azure subscription named Subscription1. Subscription1 contains two Azure virtual machines named VM1 and VM2.

VM1 and VM2 run Windows Server 2016. VM1 is backed up daily by Azure Backup without using the Azure Backup agent.

VM1 is affected by ransomware that encrypts data.

You need to restore the latest backup of VM1.

To which location can you restore the backup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

You can perform a file recovery of VM1 to:

- A. VM1 only
- B. VM2 only
- C. VM1 and VM2 only
- D. A new Azure virtual machine only
- E. Any Windows computer that has internet connectivity

You can restore VM1 to:

- A. VM1 only
- B. VM2 only
- C. VM1 and VM2 only
- D. A new Azure virtual machine only
- E. Any Windows computer that has internet connectivity

AD

QUESTION 109

Hotspot Question

You purchase a new Azure subscription named Subscription1.

You create a virtual machine named VM1 in Subscription1.

VM1 is not protected by Azure Backup.

You need to protect VM1 by using Azure Backup. Backups must be created at 01:00 and stored for 30 days.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Location in which to store the backups:

- A. a blob container
- B. a file share
- C. a Recovery services Vault
- D. a storage account

Object to use to configure the protection for VM1

[We have an expert-written solution to this problem!](#)

QUESTION 149

You plan to back up an Azure virtual machine named VM1.

You discover that the Backup Pre-Check status displays a status of Warning.

What is a possible cause of the Warning status?

- A. VM1 does not have the latest version of WaAppAgent.exe installed.
- B. VM1 has an unmanaged disk.
- C. VM1 is stopped.
- D. A Recovery Services vault is unavailable.

A

QUESTION 150

You have two Azure virtual machines named VM1 and VM2.

You have two Recovery Services vaults named RSV1 and RSV2.

VM2 is protected by RSV1.

You need to use RSV2 to protect VM2.

What should you do first?

- A. From the RSV1 blade, click Backup items and stop the VM2 backup.
- B. From the RSV1 blade, click Backup Jobs and export the VM2 backup.
- C. From the RSV1 blade, click Backup. From the Backup blade, select the backup for the virtual machine, and then click Backup.
- D. From the VM2 blade, click Disaster recovery, click Replication settings, and then select RSV2 as the Recovery Services vault.

A

QUESTION 151

You have an Azure virtual machine named VM1 that you use for testing.

VM1 is protected by Azure Backup.

You delete VM1.

You need to remove the backup data stored for VM1.

What should you do first?

- A. Modify the backup policy.
- B. Delete the Recovery Services vault.
- C. Stop the backup.
- D. Delete the storage account.

C

QUESTION 152

You have an Azure subscription.

You have an on-premises virtual machine named VM1. The settings for VM1 are shown in the exhibit.

B

QUESTION 163

Note: This question is part of a series

You have an Azure web app named App1. App1 runs in an Azure App Service plan named Plan1. Plan1 is associated to the Free pricing tier.

You discover that App1 stops each day after running continuously for 60 minutes.

You need to ensure that App1 can run continuously for the entire day.

Solution: You change the pricing tier of Plan1 to Shared.

Does this meet the goal?

A. Yes

B. No

B

QUESTION 164

Note: This question is part of a series

You have an Azure Active Directory (Azure AD) tenant named Adatum and an Azure Subscription named Subscription1. Adatum contains a group named Developers. Subscription1 contains a resource group named Dev.

You need to provide the Developers group with the ability to create Azure logic apps in the Dev resource group.

Solution: On Dev, you assign the Logic App Contributor role to the Developers group.

Does this meet the goal?

A. Yes

B. No

A

QUESTION 165

Note: This question is part of a series

You have an Azure Active Directory (Azure AD) tenant named Adatum and an Azure Subscription named Subscription1. Adatum contains a group named Developers. Subscription1 contains a resource group named Dev.

You need to provide the Developers group with the ability to create Azure logic apps in the Dev resource group.

Solution: On Subscription1, you assign the Logic App Operator role to the Developers group.

Does this meet the goal?

A. Yes

B. No

B

QUESTION 166

Note: This question is part of a series

You have an Azure Active Directory (Azure AD) tenant named Adatum and an Azure Subscription named Subscription1. Adatum contains a group named Developers. Subscription1 contains a

- C. storage3
- D. storage4

B

QUESTION 235

You have an Azure subscription that contains a storage account named account1. You plan to upload the disk files of a virtual machine to account1 from your on-premises network.

The on-premises network uses a public IP address space of 131.107.1.0/24. You plan to use the disk files to provision an Azure virtual machine named VM1. VM1 will be attached to a virtual network named VNet1. VNet1 uses an IP address space of 192.168.0.0/24.

You need to configure account1 to meet the following requirements:

- Ensure that you can upload the disk files to account1.
- Ensure that you can attach the disks to VM1.
- Prevent all other access to account1.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Firewalls and virtual networks blade of account1, select Selected networks.
- B. From the Firewalls and virtual networks

AE

QUESTION 236

Note: This question is part of a series

You have an Azure virtual machine named VM1 that runs Windows Server 2016.

You need to create an alert in Azure when more than two error events are logged to the System event log on VM1 within an hour.

Solution: You create an Azure Log Analytics workspace and configure the data settings. You add the Microsoft Monitoring Agent VM extension to VM1. You create an alert in Azure Monitor and specify the Log Analytics workspace as the source.

Does this meet the goal?

- A. Yes
- B. No

A

QUESTION 237

Note: This question is part of a series

You have an Azure virtual machine named VM1 that runs Windows Server 2016.

You need to create an alert in Azure when more than two error events are logged to the System event log on VM1 within an hour.

Solution: You create an Azure Log Analytics workspace and configure the data settings. You install the Microsoft Monitoring Agent on VM1. You create an alert in Azure Monitor and specify the Log Analytics workspace as the source.

Does this meet the goal?

- A. Yes
- B. No

VNET2---virtual network---East Asia

VM1 connects to VNET1.

You need to connect VM1 to VNET2.

Solution: You delete VM1. You recreate VM1, and then you create a new network interface for VM1 and connect it to VNET2.

Does this meet the goal?

A. Yes

B. No

A

QUESTION 241

Note: This question is part of a

You have an Azure subscription that contains the resources shown in the following table.

NAME---Type---Region

RG1---resource group---West US

RG2---resource group---East Asia

storage1---storage account---West US

storage2---storage account---East Asia

VM1---virtual machine---West US

VNET1---virtual network---West US

VNET2---virtual network---East Asia

VM1 connects to VNET1.

You need to connect VM1 to VNET2.

Solution: You turn off VM1, and then you add a new network interface to VM1.

Does this meet the goal?

A. Yes

B. No

B

QUESTION 242

You deploy an Azure Kubernetes Service (AKS) cluster named Cluster1 that uses the IP addresses shown in the following table.

IP address---Assigned to

131.107.2.1---Load balancer front end

192.168.10.2---Kubernetes DNS service

172.17.7.1---Docket bridge address

10.0.10.11---Kubernetes cluster node

You need to provide internet users with access to the applications that run in Cluster1.

Which IP address should you include in the DNS record for Cluster1?

A. 131.107.2.1

B. 10.0.10.11

User1 can add Device2 to Group1
User2 can add Device1 to Group1
User2 can add Device2 to Group2

- A. Yes No No
- B. Yes to all
- C. Yes No Yes
- D. No to all

C

QUESTION 255

Hotspot Question

You have an Azure subscription that contains an Azure Storage account.

You plan to copy an on-premises virtual machine image to a container named vmimages.

You need to create the container for the planned image.

Which command should you run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

azcopy [answer choice]

- A. make
- B. sync
- C. copy

'https://mystorageaccount[A NSWER CHOICE].com/windows.net/vmimages

- A. blob
- B. dfs
- C. queue
- D. table
- E. images
- F. file

AA

QUESTION 256

Hotspot Question

You have an Azure File sync group that has the endpoints shown in the following table.

NAME----TYPE

Endpoint1---Cloud endpoint

Endpoint2---Server endpoint

Endpoint3---Server endpoint

Cloud tiering is enabled for Endpoint3.

You add a file named File1 to Endpoint1 and a file named File2 to Endpoint2.

On which endpoints will File1 and File2 be available within 24 hours of adding the files? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
