

Practice blurring!
or a fill in the
gap type thing - it tests you + consolidates your
knowledge

DNA Vs RNA Monomer

- DNA contains thymine, whereas RNA contains uracil instead
- DNA contains pentose sugar deoxyribose, whereas RNA contains the pentose sugar Ribose.

DNA Vs RNA Polymers

- DNA is much larger bc it contains the entire genome (many genes) whereas RNA is much shorter bc it is only the length of 1 gene.
- DNA is double-stranded whereas RNA is single-stranded.

all genes in chromosome = genome
