Basic Interactive Slides

Student Activity: In this activity, students read and take notes.

It also includes slides for short answer questions, multiple choice questions, and a discussion worksheet for open-ended prompts.

How to share with students: These pages can be assigned digitally using an LMS (like Google Classroom), where students can work on their own slide decks via "Make a Copy for Each Student." Each slide is set up with text boxes for students to type in.

Please Note: Because Diffit resources can vary in length, be sure to check the formatting on each slide.

Learn More: [Please reach out](#) with any questions or feedback. You can also learn more on our [FAQ page](#), or get more resources at [Diffit.me](#)!

Suggested Lesson Flow:

1. Students complete a Notice/Wonder Image Analysis.
2. Preview Vocabulary with students prior to reading.
3. Have students read and take notes.
4. Have students go through the Multiple Choice Questions. Students will answer each question and explain their thinking.
5. Have students complete the Short Answer Questions.
6. Have students complete the Open Ended Questions and discuss with partners or groups.

Feel free to edit, remix, and use this resource however works best for you and your students! [Find editing tips here!](#)
