

Potential - ANS this type of energy is derived from position, shape, or state NOT from motion (MC)

Power - ANS Formula for _____: work divided by time w/t (MC)

Power - ANS rate at which work is performed (MC)

Pressure - ANS The two valves on the radiator caps are a _____ valve and a vacuum valve.

Prestige most nearly means - ANS status

Primary Coil Winding - ANS low-voltage winding in a car's ignition (AI)

Primata - ANS the ORDER which includes humans (and other primates) (GS)

Probability - ANS number of desired outcomes

number of possible outcomes (AR)

Proteins - ANS necessary for body's maintenance, growth, and repair (GS)

Rectifier - ANS AC (electricity from the alternator) is converted to DC by the _____. (AI)

Red - ANS color with the lowest frequency (GS)

Red Blood Cells - ANS component of blood which carries oxygen (GS)

Refraction - ANS when light bends due to passing through a medium (GS)

Refractive Index - ANS ratio by which light is slowed when passing through a medium's _____. (GS)

Resistance - ANS can slow down the flow of electrons but will not stop it completely (EI)

Respiration - ANS process by which animals convert oxygen and sugars into carbon dioxide and water (GS)

riding the mail plane is a low-budget way to visit america's largest national park-- wrangell-st.elias-- 13 million acres of scenic beauty. copper first drew prospectors to this part of alaska. from 1911 to 1938, the kennicott mine produced 200 million tons of it. now a mecca for tourists, the town of kennicott was abandoned to the ghosts when the

Spaces are placed between slabs of concrete in city sidewalks to? - ANSallow for expansion and contraction

Spark-ignition System - ANSDiesel engines don't have this compared to gas engines for burning gas (AI)

Stoichiometric Ratio - ANSIDEal air-fuel mixture for insertion into the engine cylinder (14.7:1) (AI)

sustain most nearly means - ANStolerate

Taps and dies are tools to? - ANSCut threads for nuts and bolts

Ten - ANSON the Richter scale each number greater is ____ times greater than the last. (GS)

Tendons - ANSconnects muscle to bone (GS)

Testes - ANSproduces sperm (male reproductive system) (GS)

the best saw for accurately cutting 3 inches off the length of a 2 x 8 x 18-inch piece of lumber is a - ANSradial arm sawt

the cashier negated the charge on the item - ANSnullified

the catalytic converter is part of what system? - ANSEmission control system

The chemical formula of a compound describes the elements the compound contains and the... - ANSthe ratio of elements in a compound

The engine flywheel bolts to the? - ANScrankshaft

the factors of $2x^2+xy-3y^2$ are - ANS $(2x+3y)(x-y)$

the function of the master cylinder is to - ANSApply hydraulic pressure to the wheel cylinders

the hypotnuse of a right triangle has a length of 14 units and a side that is 9 units long. which equation can be used to find the length of the remaining side? - ANS $x^2=14^2+9^2$

the illustration shows a water tank that is made of wood planks and reinforced metal hoops. why are the hoops closer together near the bottom of the tank? - ANSthe water pressure pushing against the sides of the tank is greater near the bottom

the illustration shows an example of... - ANSan inclined plane
